

SAMPLE OF SURNAMES FROM THE CENSUS OF 1911 OF IRELAND

Compiled by Frank O'Donovan

On the Tables below I have listed almost three quarters of the **Surnames** on the Census of all 32 counties in Ireland in 1911.

Murphy was clearly the most common Surname in this sample followed by **Kelly**. I should emphasise this is from the 1,888 surnames I selected. Interesting too that the sample in Table 2 includes 22 surnames where that surname appears just once in the whole country.

Table 1, the first section, is in descending order of occurrences of the 300 most frequently occurring surnames from the 1,888 sample of surnames I selected. It gives Surname, the frequency of occurrences of that Surname and that surname as a percentage of the total population. So the Surname of Murphy was used in 55,673 instances, or 1.270% of all the names of the 4,384,519 people in the country.

The use of **O'** in the surname was increasing too by 1911 but generally such occurrences were well below the numbers who were not using the **O'**. Example is in **Donovan / O'Donovan** in this link.

<http://bmdnotices.com/remembrance-garden-book/viewremembranceold.aspx?remembranceid=19>

However we do see that **O'Brien, O'Neill** (ONeill) and **O'Connor** (OConnor) did embrace the **O'** in their respective names as with **Brien / O'Brien** in

<http://bmdnotices.com/remembrance-garden-book/viewremembranceold.aspx?remembranceid=140>

I was surprised by the frequent occurrences of some names and equally the more infrequent number of other surnames. As I said in my [Sample of First Names from the Census of 1911 of Ireland](#) we each think of the popularly used names in our own local area. Some names are more popular in different parts of the country of course.

So we next look at the top 300 surnames from the sample.
